In other words, we interpret that you would like to reallocate some of the IO scopes and F4E scopes on condition that the cumulative value of the scopes to be executed by European and non-European entities respectively will remain consistent with the originally estimated values.</p> <p>Answer:</p> <p>Kindly note that we are not in position to amend the applicable rule. However, we intend to further clarify its practical application in the instruction document to be included within the Pre-Qualification package. This clarification will confirm that the assignment of a non-European entity as a subcontractor to the scope funded by F4E is permitted, subject to certain conditions.</p>

2	Purpose	<p>Technical Summary D_ B6XGG9 2.3</p> <ul style="list-style-type: none"> The first sentence at Section 2 Purpose: <i>"The HCF Project scope delivered by the Contractor <u>shall be fit for purpose.</u>"</i> 	<p>Can you modify the description and replace it with the following: <i>"The HCF Project scope delivered by the Contractor <u>should be:</u>"</i> </p>	<p>Kindly note that we are not in position to amend the description. By using "fit for purpose", we intended to convey that IO and F4E require the selected contractor to commit the full execution of the designated scope in accordance with the requirements and to guarantee delivery of the required functionality. The precise contractual terms and conditions will be refined in a future contract draft. Nevertheless, considering that this is a Competitive Dialogue process, this matter and contractual terms may be subject to further discussion and adjustments with pre-qualified candidates later during dialogue stage, if necessary.</p>
